**The Stow & Go is a versatile and durable solution for transporting reels and spools efficiently across the jobsite or warehouse. Designed with ease of use and flexibility in mind, this system offers forklift access for quick loading and unloading, ensuring a smooth workflow for your team.**

Enhance your team's productivity and protect your valuable materials with the Stow & Go transport system. Whether moving reels within a warehouse or between job sites, this sturdy and reliable cart ensures the job gets done quickly and safely.

# Key Features:

## **Effortless Transport:**

Easily move large reels and spools with the Stow & Go's user-friendly design. The integrated forklift pockets allow seamless lifting and transportation without the need for manual labor.

## **Durable Construction:**

Built to withstand heavy use, the Stow & Go system is constructed from high-quality materials, ensuring long-lasting performance in demanding environments.

## **Compact and Mobile:**

With a compact design that maximizes space, the Stow & Go can be transported and stored efficiently, making it a practical addition to any workspace.

## **Versatile Applications:**

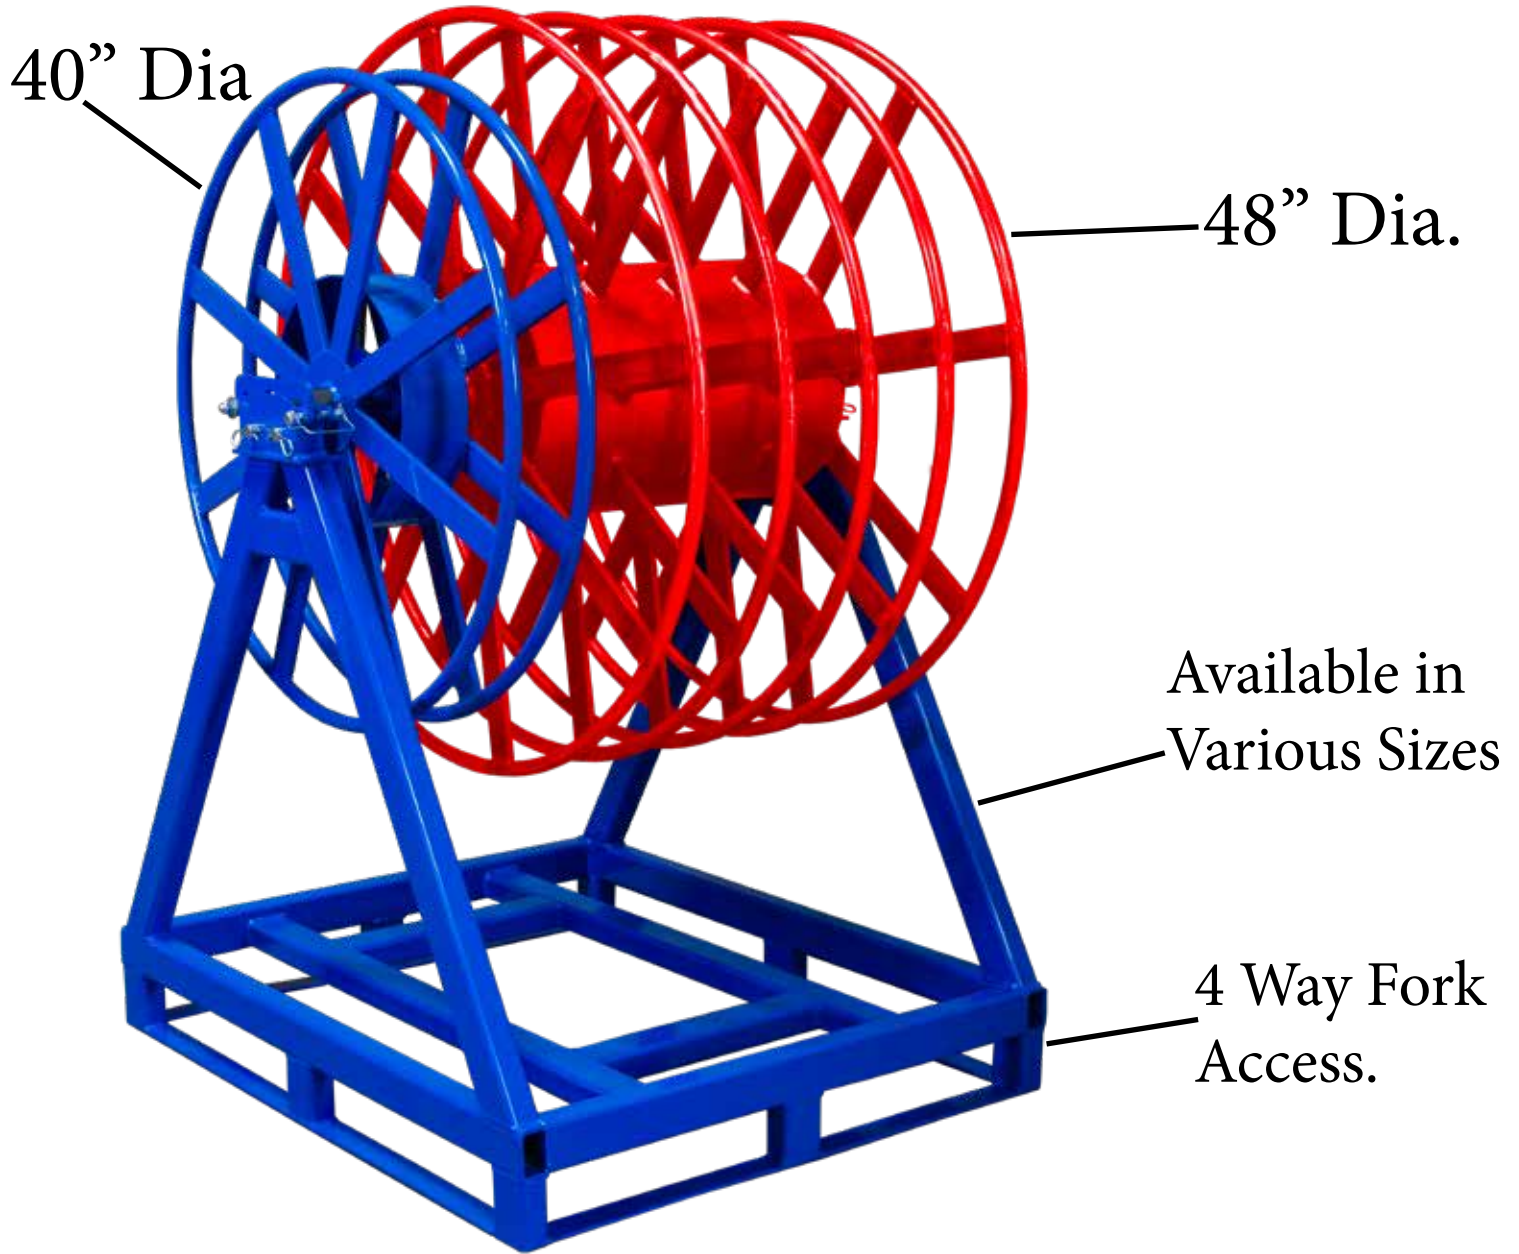

Ideal for wire handling, cable management, and other applications, this system adapts to the unique needs of your operation.

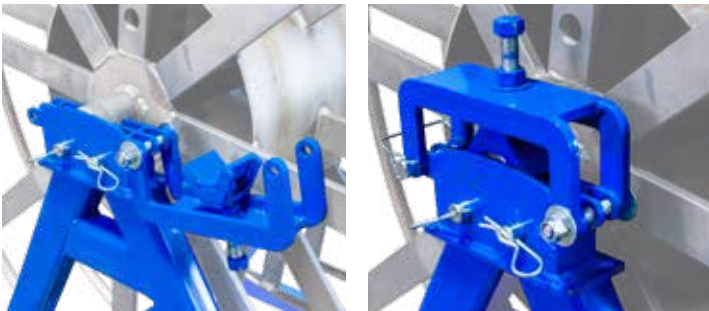

LHR570 + LHR4-30-48

# YOUR SOURCE FOR WIRE & CABLE HANDLING SOLUTIONS!

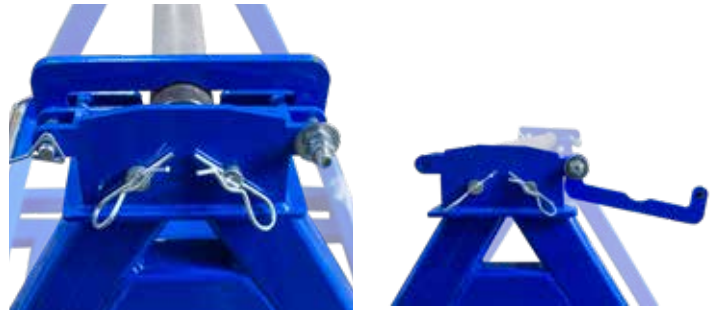

Customize your Frame & Reel Capacity

Stand comes with brakes for the Reels

Secure Axle with the Hatch

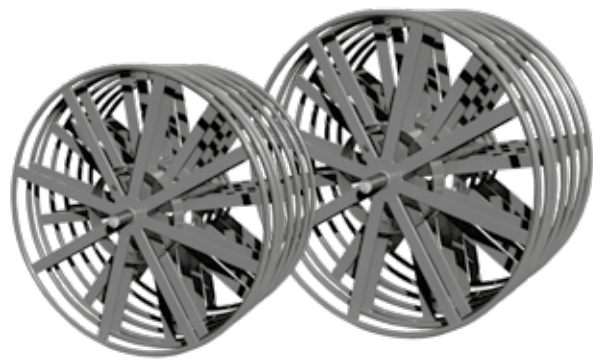

Choose from two convenient sizes: **40 inches or 48 inches**, depending on your storage and operational needs. Both sizes offer the same durable construction and efficient organization for your cable, wire, rope, hose, or tubing. Select the size that best fits your workspace and material requirements.

# LongHorn Reels are expertly designed for the organized storage of cable, wire, rope, hose, or tubing, ensuring they remain tangle-free.

Available in various compartment configurations and widths, these reels are perfect for managing different materials efficiently. They work seamlessly with Reel Stands, which can accommodate up to five independently spinning reels.

## COMPARTMENT REELS

- Available in 1, 3 and 4 compartment styles
- Extra Heavy Duty: 1/2" x 2" solid steel spokes, 11ga tubular rings and 11ga drum with starter holes pre-cut
- Accepts 2" axle
- Standard 40" and 48"
- Powder coat finish
- Customer sizes available on request

## EASYREEL™ STANDS

- 5000lb capacity
- Powder Coat Finish
- Various width available
- 2" axle included
- Four sided forklift access
- Use with paralleling reel
- Optional caster feet available
- CUSTOM SIZES AVAILABLE

EasyReel stands work with our compartment reels to make handling wire on the job site easy. A single compartment reel can be used with a multicompartment reel to allow pulling of a ground wire along with the hot strands. Each end of the axle rides on 4 bearings. Made from heavy steel tube, EasyReel stands can handle the abuse seen in on-the-job site.

| Reel Stands                        |                                                            |

# LONGHORN REEL™ JOB BOX

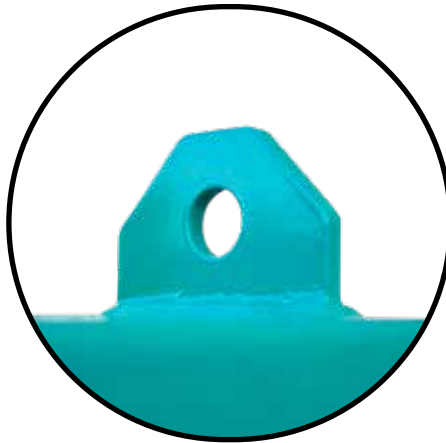

## Asset Protection

Padlockable with a strike protector to safeguard assets from theft.

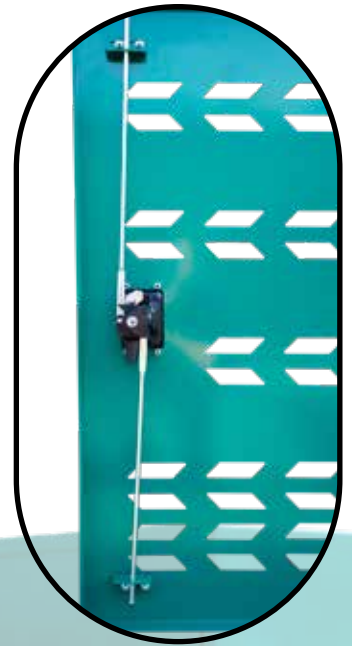

## D-Rings

Welded D-rings secure the unit during shipping and can also be used to chain the unit at the jobsite.

## Handles

Positioned on opposite sides for easy maneuvering of the unit.

## Durable Construction

Built with heavy-duty steel and a durable powder coat finish that resists rust and scratches.

## 180° Doors

Hinged in two locations, allowing the door slabs to open fully to 180° for easy access.

**High Load Capacity**  
Available models offer a capacity of 2,000 lb or 3,000 lb.

LHR804    Easy Security Cart    31" x 61.5" x 72"

Enhance wire pulls on jobsites for faster and more efficient electrical installations while keeping wire supplies secure when not in use. The combination of mobility, security, and smooth payout makes the LongHorn Reels Job Boxes an essential tool for any electrical project.

### **Effortless Transport of Bulk Supplies**

With features like lifting eyes, fork pockets, push bars, and casters, this cart allows for easy transport of large wire quantities across the jobsite, ensuring your supplies are always within reach.

### **Boost Productivity**

Bring everything you need to the jobsite in one trip. The mobile, adjustable design allows for tangle-free payout of various cable and wire types, maximizing efficiency and reducing downtime.

### **Fully Mobile Design**

The slim profile enables the Wire Pull Cart (WPC) to navigate through standard 34" doorways and narrow aisles with ease. Equipped with lifting eye bolts, casters, and fork pockets, it ensures smooth mobility and accessibility throughout the jobsite.

### **Secure Asset Protection**

Keep your cables protected during transit and on the jobsite. Once the Wire Pull Cart is loaded, securing your materials is as simple as locking the unit, providing peace of mind.

### **Enhanced Performance**

The WPC supports up to 3,000 pounds of wire on adjustable shafts, making it easy to rewire office spaces or residential buildings without interruptions.

# LIGHT FIXTURE LIGHT

## Pre-Assembled and Ready to Use

Bring all essential materials and fixtures with you in one trip, ensuring your team is ready to work efficiently from the moment they arrive.

LHR820

**This ergonomic material handling cart is specifically designed for light fixtures, ensuring they remain secure compared to stacking on non-specialized carts or pallets. It also enhances safety for electricians by eliminating the need for manual handling of light fixtures to the installation site.**

#### **Efficient and Safe Installation**

Streamline your commercial construction projects by transporting light fixtures directly to the installation point, saving valuable time.

#### **Damage-Free Storage and Transport**

Protect your light fixtures both in storage and on the job site with our vinyl-edged steel racking. Store fixtures without packaging to prevent concealed damage.

#### **Versatile Mobility**

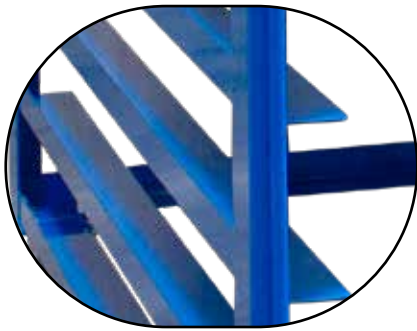

The slim design of some models allows the cart to pass easily through standard door frames, while heavy-duty casters ensure smooth movement wherever the job takes you.

#### **Speed Up Installations**

Load the cart with enough light fixtures for the entire job, reducing travel time. The easy-rolling unit can be effortlessly moved from one installation site to the next.

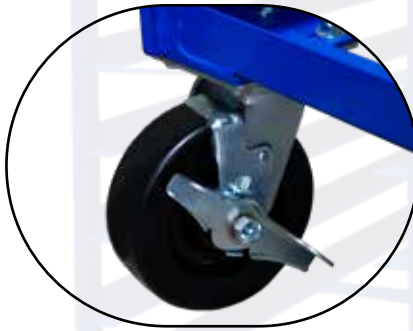

#### **Reduce Waste**

Cardboard packaging often hides damage and adds time to the unpacking process. With this cart, installation teams can transport unpacked fixtures quickly and efficiently throughout the project.

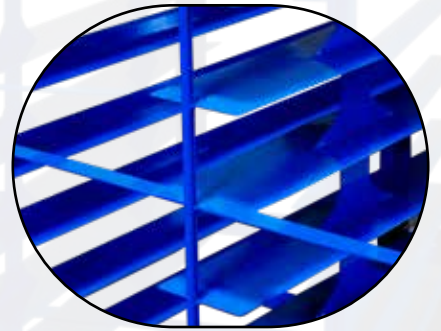

#### **Asset Protection**

Our L-shaped support design ensures your light fixtures are safeguarded from accidental bumps and impacts during transport and installation. This added layer of protection helps prevent damage, keeping your valuable materials intact and secure throughout the project.

#### **Mobility**

Equipped with two swivel casters and two locking casters, the unit can be easily maneuvered into position manually. Caster brakes provide added control by preventing any unwanted movement, ensuring stability when needed.

#### **Easy Slide In-&-Out Access**

Your installation team can effortlessly access unpacked fixtures throughout the project, ensuring quick and efficient handling. This design simplifies the process, saving time and minimizing disruptions during installation.

## **Light Fixture Cart for Pre-Wired Fixtures**

LHR830

Picture Cart

" x 48"

**Enhanced Efficiency:** Pre-wire and assemble your light fixtures in the shop, reducing installation time at the job site.

**Safe Transport:** Sturdy construction and thoughtful design prevent damage to fixtures during transit, ensuring they arrive ready to install.

**Smooth Mobility:** Heavy-duty casters allow for easy movement, even through narrow spaces, making transport through the job site quick and hassle-free.

**Ideal for Large Jobs:** Suitable for handling multiple fixtures, this cart helps reduce the number of trips required and boosts overall project efficiency.

# Conduit Carts: 3,000 lb Capacity

Our Conduit Carts are designed to handle the toughest jobs with a robust 3,000 lb capacity. Constructed with round 1.9" steel tubing welded to a square platform, this cart provides a strong, rigid base capable of holding substantial loads while maintaining stability and durability.

Equipped with two 6" swivel casters for easy maneuverability and two 6" rigid casters for added support, this cart ensures smooth transport across various surfaces. Whether you're moving conduit across the job site or within the warehouse, this cart will boost productivity and reduce strain on your team.

LHR432

Conduit Cart

LHR432 - Folded For Storage

**Heavy-Duty Design:** Strong steel construction with welded joints to provide a long-lasting, reliable solution for your transportation needs. Folds Flat when not in use.

**Effortless Movement:** The combination of swivel and rigid casters ensures easy positioning and secure transport.

**High Capacity:** With a 3,000 lb load capacity, this cart is ideal for large-scale projects requiring substantial material transport.

**Versatile Applications:** Perfect for moving conduit, pipe, and other long materials safely and efficiently.

# Stackable PVC Pipe Storage Rack

Protect your PVC pipe from damage with our Stackable PVC Pipe Storage Rack, designed for efficient and safe storage in your yard or warehouse. Measuring 215” long and 53” wide, these racks provide ample space to store large quantities of pipe securely, keeping them off the ground and safe from accidental damage.

The stackable design allows for easy organization of your inventory, saving valuable yard space while ensuring quick access to materials when needed. These racks are an ideal solution for managing large volumes of PVC pipe in both indoor and outdoor settings.

**Protects Materials:** Ideal for outdoor storage, this rack ensures that your PVC pipe remains safe and organized, minimizing the risk of weather-related or accidental damage.

| LHR206 | PVC Storage Rack Rolling | 96” x 32” x 41”  |

**Durable and Secure:** Constructed to handle the weight of PVC pipe and prevent damage during storage. The elevated design keeps the pipe off the ground, away from potential hazards.

**Space-Saving Stackable Design:** Stack multiple racks to optimize space in your yard or warehouse, making it easy to store large amounts of PVC without cluttering the area.

**Large Dimensions:** With a length of 215” and a width of 53”, this rack accommodates significant quantities of PVC pipe, reducing the need for frequent restocking.

# LHR460 REEL ROLLER PLATFORM BY LONGHORN REELS

Presenting our latest innovation, the **LHR460 Reel Roller Platform**, specifically designed for safe and efficient cable payout without the need for traditional Reel Stands.

The LHR460 accommodates reels of any size, whether made of wood or steel, making it a versatile solution for a wide range of applications. Constructed from heavy-duty steel, this platform ensures long-lasting durability and dependable performance.

For more information or to request a quote, please contact LongHorn Reels today!

## Total Cable Management Solution

The LHR460 Reel Roller Platform is the ideal resource for electrical and data-cable suppliers, construction electricians, and wire/cable distribution centers.

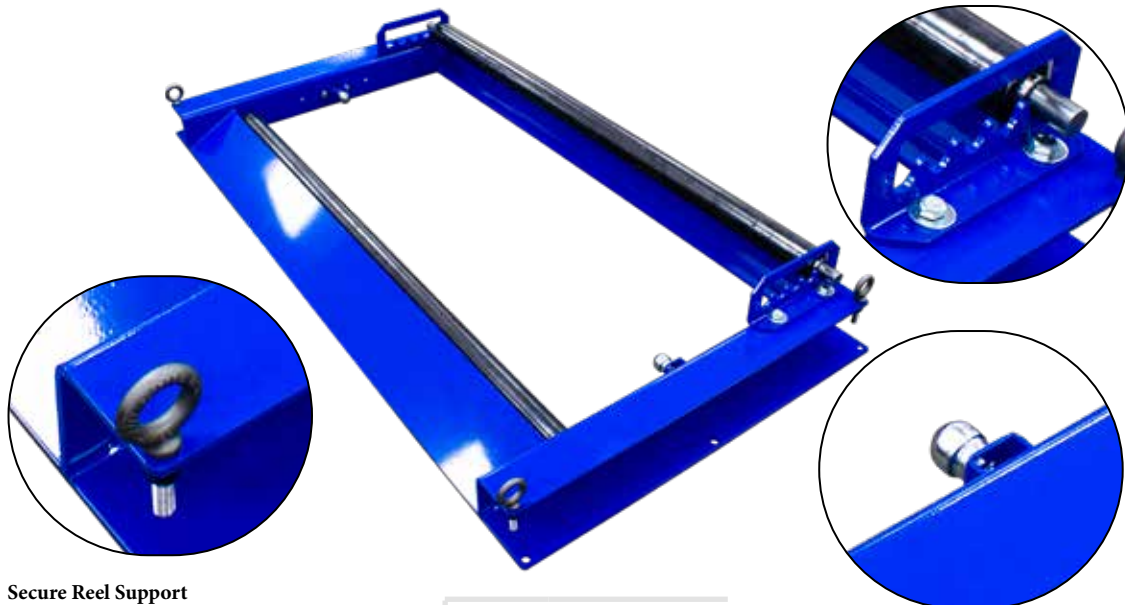

Combined with accessories such as a Reel Stands and Job Boxes, the LHR460 offers a turnkey solution for loading and handling cable reels safely and efficiently.

### Built for Durability

Constructed from rugged steel and finished with a scratch and impact-resistant powder coating, the LHR460 Reel Roller Platform is built to last for decades, even in the most demanding industrial environments.

### Adjustable for Any Reel Size

The rear roller on the LHR460 can be adjusted to six different positions, allowing for quick and easy accommodation of larger or smaller reels. This adjustment process is simple, locking the steel rollers securely in place to ensure a smooth payout every time.

### Secure Reel Support

Includes two reel-axle bearing assemblies, each equipped with two eye bolts, along with four base-mounted eye bolts. These components work together to securely prevent reel movement during payout, even under resistance.

### LHR460 Reel Roller Platform

### Smooth Rollers

Ball transfer rollers ensure smooth and steady operation, making it easy to fill reels or pay out cable with minimal friction and effort.

## CENTER HANG SLANT BACK

## DOUBLE HANGING BRACKETS

## J-CHANNEL WITH TROLLEYS

# LONGHORN REEL™ RACKS SYSTEM

Optimize your warehouse operations with the Longhorn Reel™ Racks System, a custom-designed wire storage solution tailored to your specific needs. At Longhorn Reel, we understand the importance of maximizing efficiency in wire handling and storage. Our expert team will work with you to analyze your cut room operations and develop a rack system that makes the best use of your space while enhancing employee productivity.

Whether you're managing a small facility or a large-scale operation, the Longhorn Reel™ system will be customized to fit your unique wire storage and retrieval requirements.

## **Key Features:**

### **Center Hang Slant Back**

Our Center Hang Slant Back design provides an organized solution for storing and accessing reels, offering a tilted configuration that ensures easy visibility and smoother wire payout. This system is ideal for accommodating various reel sizes, allowing for streamlined operations in even the most compact spaces.

### **Double Hanging Brackets**

The Double Hanging Brackets offer an efficient way to store multiple reels on a single rack, doubling your storage capacity without consuming extra floor space. These brackets are designed for easy reel loading and unloading, reducing strain on your employees and cutting down on time spent handling wire reels.

### **J-Channel with Trolleys**

The J-Channel with Trolleys feature is perfect for wire management systems that need mobility. The integrated trolleys allow for smooth reel movement along the J-channel, making it simple to shift reels into place for cutting or storage. This feature improves workflow by reducing manual lifting and reel transport, ultimately increasing efficiency.

### **Customized Solutions for Every Warehouse**

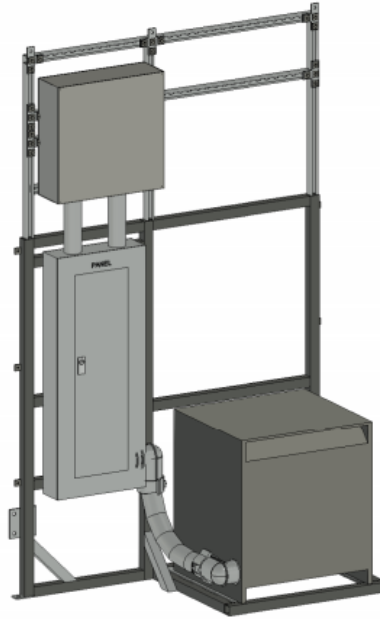

No two warehouses are the same, and that's why we design storage solutions based on your specific needs. Our team will collaborate with you to ensure your system makes the most efficient use of both vertical and horizontal space, while reducing the time your employees spend handling materials. From small adjustments to comprehensive overhauls, Longhorn Reel™ will develop a system that supports your operational goals.

# Custom Manufacturing Solutions

At LongHorn Reels, we provide comprehensive custom manufacturing solutions, tailored specifically to meet the unique requirements of Original Equipment Manufacturers (OEM) and other businesses.

In addition to our custom services, we offer Private Label programs, giving businesses the opportunity to bring their own branded products to market with the assurance of high-quality manufacturing and craftsmanship.

Our in-house design team works closely with you from concept to completion, ensuring that every part is created to your exact specifications. With the ability to handle full turn-key production, we take care of every step of the process — from design, fabrication, and assembly, to packaging and delivery.

Whether you need small components or large assemblies, our team ensures precision and efficiency, leveraging cutting-edge technology and years of expertise.

Manufacturing takes place in one of our two state-of-the-art facilities located in Texas, where we utilize a wide range of advanced equipment to meet the demands of any project. If your products require finishing, we have a high-capacity powder coating line as well as a batch oven, allowing us to deliver durable and high-quality coated parts to withstand even the toughest environments.

Our large inventory of tooling and machinery allows us to provide cost-effective solutions, reducing the overhead expenses associated with fabricating custom parts. By eliminating the need for additional third-party tooling and machinery, we offer competitive pricing without compromising on quality.

Whether you need small-scale production runs or high-volume manufacturing, we have the resources and capabilities to meet your needs. We invite you to contact us to discuss your specific requirements, get more details about our custom manufacturing services, and request a Request for Quotation (RFQ). Our team is ready to help you bring your vision to life.

For more information, please contact us or visit our website to learn more about how LongHorn Reels can serve your custom manufacturing needs.
